February 2026

Kinlan M.G. Jan, PhD

Marine Ecologist | Biodiversity & Ecosystem Strategy

Environmental scientist specializing in biodiversity, ecosystem dynamics, and climate change impacts. Experienced in translating complex ecological data into actionable insights for environmental management, ecosystem assessment, and sustainability decision-making. Background in interdisciplinary collaboration, long-term monitoring, and cross-institution project coordination.

kinlan.jan@hotmail.ch KMGJan KMGJan 0000-0002-5579-0017

Core Competencies

Environmental data synthesis | Biodiversity & ecosystem assessment | Climate change impacts | Stakeholder engagement | Science–policy interface | Project & program coordination | Communication of complex environmental issues | Interdisciplinary teamwork | Quantitative ecological analysis (R) | Molecular biodiversity tools (eDNA)

Professional Experience

Doctoral Researcher, Marine Ecosystem Analysis — **Stockholm, Sweden**
Stockholm University — *September 2021 — January 2026*

- Led ecosystem analyses linking biodiversity change, climate variability, and trophic dynamics to ecosystem functioning
- Synthesized long-term monitoring data to support ecosystem assessment and management-relevant interpretation
- Translated complex ecological processes into clear outputs for interdisciplinary research and applied contexts
- Coordinated field, laboratory, and analytical workflows across multi-partner projects
- Supervised *MSc* students and supported capacity building in molecular biodiversity tools
- Produced scientific outputs supporting understanding of ecosystem change and resilience under climate stressors

Leadership Engagement

Chair & Vice-Chair, PhD Council
Stockholm University — *2022 — 2023*

- Represented doctoral researchers in departmental governance and decision processes
- Facilitated dialogue between students and academic leadership
- Initiated an interdepartmental scientific symposium to strengthen cross-field collaboration

Scientific Event & Session Organization
Swedish Oikos Meeting, Stockholm — *2025*
Ocean Sciences Meeting, Glasgow — *2026*

- Co-organizer and session co-chair at international scientific meetings
- Contributed to shaping interdisciplinary research discussions

Professional Collaboration and Communication

- Worked in multi-institution European research collaborations
- Communicated environmental research to interdisciplinary audiences
- Experience working with monitoring data relevant to ecosystem-based management
- Teaching and mentoring experience supporting skills development in quantitative ecology and biodiversity methods

Education

***PhD*, Marine Biology** **Stockholm, Sweden**
Stockholm University *September 2021 — January 2026*
Research focus: Biodiversity change, trophic interactions, and ecosystem functioning under climate change.

***MSc*, Marine Biology** **Stockholm, Sweden**
Stockholm University *August 2019 — June 2021*

***BSc*, Biology** **Neuchâtel, Switzerland**
The University of Neuchâtel *September 2017 — June 2019*

Selected Publications

Author of 7 peer-reviewed publications on biodiversity, ecosystem functioning, and climate impacts in scientific journals including Science Advances, Limnology & Oceanography, and ICES Journal of Marine Science.

- ***Jan KMG***, Hentati-Sundberg J, Larson N, Winder M. 2025. *Limited resource use overlaps among small pelagic fish species in the central Baltic Sea*. ICES Journal of Marine Science **82**:9, fsaf122. doi:10.1093/icesjms/fsaf122
- ***Jan KMG***, Serandour B, Walve J, Winder M. 2024. *Plankton blooms over the annual cycle shape trophic interactions under climate change*. Limnology and Oceanography Letters **9**:3, 209-218. doi: 10.1002/lol2.10385
- Novotny A, Serandour B, Kortsch S, Gauzens B, ***Jan KMG***, Winder M. 2023. *DNA metabarcoding highlights cyanobacteria as the main source of primary production in a pelagic food web model*. Science advances **9**:17, eadg1096. doi: 10.1126/sciadv.adg1096

Languages

- French (native)
- English (fluent)

Technical Tools

- R (statistical analysis, ecological modelling, and data visualisation)
- Environmental time-series analysis
- Molecular biodiversity methods (eDNA)
- Ecosystem data integration and synthesis
